Coffee & Lunch Provided

WHEN

Friday, January 10, 2020

WHERE

**JB Wholesale Roofing and
Building Supply, Chatsworth**
21524 Nordhoff St.
Chatsworth, CA 91311

AGENDA

8:00 AM - 12:00 PM
Coffee & Lunch Provided

Products Covered:

S2000 Silicone System: The GacoFlex S2000 Series Solvent-Free 100% Silicone Roof Coatings System provides a proven, guaranteed solution for renewing your weathered and leaking roof.

S4200 Silicone System: The GacoFlex S4200 Series Solvent-Free 100% High Adhesion Silicone System covers more surface area with less material than other competitive silicones, exhibits outstanding peak hide coverage on granulated surfaces, and with its unparalleled adhesion to multiple substrates, it eliminates the need for an epoxy primer in most cases, allowing for faster installation and lower labor costs.

GacoPatch: GacoPatch is a flashing grade, extremely durable, standalone silicone roof patch that does not contain asphalts or acrylics and is designed to be installed in a single application without reinforcement on a variety of substrates, including damp surfaces. GacoPatch remains permanently flexible, even under ponding water and is UV stable, so it will not chalk or crack.
