

PROTECT THE ROOF AND TAKE IT TO A HIGHER LEVEL OF SAFETY

PROVIDING A TOTAL SOLUTION

Negligence of a roof caused by common foot traffic can be extremely costly. A small leak from an accidental puncture often causes untold damage to the contents of a building, which can potentially cost up to hundreds of thousands of dollars.

Additionally, improper safety measures can be just as expensive, and sometimes can cause irreparable damage to those who access the roof. Roof fall construction accidents can pose life-threatening or life-altering situations. And in the commercial roofing trade, where installation happens far above the ground, it's a constant concern. Investing in safe roofing practices and programs can save lives, keep projects on time, and help contractors and building owners avoid costly liabilities.

At Firestone, we are all about being the company you can count on for every building performance solution you're looking for, from roots to rooftops. By offering protection and safety accessories, you can provide a total solution, while ensuring continued success in the market.

QUICKSEAM YELLOW SAFETY STRIP

QuickSeam™ Yellow Safety Strip is a nominal 30-mil yellow TPO unsupported membrane, laminated to white cured seaming tape in 5.5" x 100' rolls. The bright yellow color of QuickSeam Yellow Safety Strip easily identifies hazards to keep your rooftop maintenance workers alert and protected on the job.

Features and Benefits

- Identifies areas of concern such as roof edges, rooftop equipment, expansion joints, drain sumps, photovoltaic rooftop energy systems, vegetative roofing systems (SkyScape™ Vegetative Roof System) and daylight or skylight systems (SunWave™ Daylighting System)
- QuickSeam™ Tape technology allows for compatibility with UltraPly™ TPO, RubberGard™ EPDM, or RubberGard™ EcoWhite™ EPDM roofing systems
- QuickSeam Tape provides a weld-free application
- Yellow TPO membrane offers a long-term safety strip option that doesn't fade (*compared to paints or coatings*)

PROTECTIVE, STABLE WALKWAYS FOR HIGH-TRAFFIC AREAS

ULTRAPLY™ TPO WALKWAY PAD

- Same proven Firestone UltraPly TPO formulation for superior long-term weathering and heat-weldability
- Textured crosshatch allows for visibility and increased slip resistance
- Scrim reinforcement provides dimensional stability and increased durability
- Product contains recycled materials
- Reflective white surface reduces thermal expansion, providing a smooth walking surface

X-TRED™ WALKWAY PAD

- Available in 30" x 30' rolls
- Diamond-cut surface provides slip resistance
- Enables self-draining and minimizes ponding water
- Can be installed on TPO, PVC, EPDM and modified bitumen roofing systems
- Does not require additional heat-welding equipment for installation
- Loose-laid design allows for removal to make repairs and to clean, if necessary

QUICKSEAM™ WALKWAY PAD

- High-quality rubber with QuickSeam Tape factory-laminated to the bottom
- Adheres securely to primed RubberGard™ EPDM roofing membrane
- Provides high levels of hardness and tensile strength
- Offers excellent wear and tear resistance
- Displays excellent cold flexibility
